

This Attractive SUV shown at Geneva Motor Show March 2005. Built at the Kvasiny plant in the Czech Republic. Both 4x4 and front-wheel drive engine line-up announced. Production started on 12 May 2009.

The new Škoda Yeti is characterised by the symbiosis of a unique design, safety, functionality and comfort.

The new model comes with new engines and new technical solutions, such as the **off-road regime** that adapts the settings of the electronic systems to driving on rough terrain, an electrically-controlled two-part **panoramic sunroof** and a **fixing system** with horizontal slats and movable hooks in the luggage space.

The first Škoda **SUV** is ready to accept your challenges and exceed all expectations..
